

Code of Conduct

Simulation & Modeling Society (MCSMS)

Maliyadeva College, Kurunegala

May 27, 2026

1. Purpose

The goal of the Simulation & Modeling Society is to foster a collaborative and scientifically rigorous environment. This Code of Conduct ensures that all members can learn and contribute in a respectful, honest, and safe community.

2. Scope and Applicability

This Code applies to all activities conducted under the Simulation & Modeling Society, including physical meetings, workshops, digital communication platforms, and any official Society-related work.

3. Adherence to School Rules

All members must comply with the general rules and regulations of Maliyadeva College at all times. Society activities are an extension of the school environment, and the school's authority remains paramount.

4. Academic Integrity

We value the honest pursuit of knowledge.

- **Originality:** Members must present their own work. Plagiarism—presenting others' ideas, code, or models as one's own—is strictly prohibited.
- **Collaboration:** While peer learning is encouraged, members must be able to demonstrate a full understanding of any work they submit or present.
- **AI Usage:** AI tools are permitted for debugging, syntax assistance, and documentation. However, core simulation logic should be developed by the member. AI usage must be transparent, and members must be able to explain and defend any AI-assisted work when reviewed.

5. Digital Conduct

As a technical society, we interact frequently in digital spaces.

- **Communication Ethics:** Communication must be professional and constructive. Harassment, bullying, or exclusionary behavior will not be tolerated.
- **Resource Stewardship:** Members must use the Society's digital assets (GitHub Organization, website, etc.) responsibly. Unauthorized modification of others' projects is prohibited.
- **Security:** Credentials and access tokens must never be shared with non-members. Report any security concerns to the Committee immediately.

6. Personal Conduct and Safety

- **Supervision:** Meetings must be conducted on school premises with a Committee member present.
- **BYOD:** Members are responsible for the safety and maintenance of their own computing hardware.
- **Inclusivity:** The Society is open to all students regardless of prior experience. Members are expected to help integrate and support beginners.

7. Enforcement and Discipline

All disciplinary decisions are made by the Executive Committee under supervision of the Teacher-in-Charge. Violations of this Code will be handled in accordance with the Society Bylaws:

- **Warnings:** Minor infractions will result in verbal warnings.
- **Probation:** Repeated infractions (more than two warnings in a term) will trigger a Committee review.
- **Termination:** Serious misconduct may lead to the suspension or termination of membership.
- **Appeals:** Any member subject to disciplinary action has the right to appeal to the Teacher-in-Charge within one week of the decision.

By participating in the Society, members acknowledge their agreement to abide by this Code of Conduct.
